Luba Yudasina

Software Engineer, YouTuber, Opera Singer
San Francisco, California

Общие сведения

I'm a Backend Engineer at Airbnb, YouTuber (www.youtube.com/c/LifeofLuba), and an Opera Singer (<https://www.airbnb.com/experiences/212478>).

Опыт работы

Airbnb

2 года 9 месяцев

Software Engineer, Homes Platform

июнь 2018 - Present

San Francisco Bay Area

Led the backend architecture and development of Host Reservation Details page redesign across all Airbnb platforms and endpoints

Software Engineer, Risk

сентябрь 2016 - июнь 2018 (1 год 10 месяцев)

San Francisco Bay Area

Worked on Account Integrity (account takeovers) and content moderation teams

Built a time machine service for user to clean their account automatically (all the changes made on their account from devices user doesn't recognize will be wiped)

Worked on 3rd party fraud vendor integration

Built an Inappropriate Content detection system that Trust and Safety agents can use to protect Airbnb community

Worked on data and business logic migration from Ruby on Rails monolithic application to a Java service

Encircle

Sales Engineer

май 2016 - август 2016 (4 месяца)

Waterloo, Canada

Airbnb

Software Engineer

сентябрь 2015 - январь 2016 (5 месяцев)

San Francisco Bay Area

- Fully developed Trip Collaboration Feature on Android. Trip Collaboration allows users to collaborate on Wish Lists with their friends, comment on selected listings, query the price and availability for all listings in the Wish List. Feature was launched in January. In 2016 17% of new users are predicted to register on Airbnb through Trip Collaboration.
- Architected and implemented the API for Trip Collaboration in Ruby on Rails using internal API framework Restore. The API supports Web, iOS, and Android.
- Lead development of an internal Phabricator integration with Slack. All Phabricator notifications are now available on a separate internal Slack channel. Increased team's efficiency by 20%.
- Implemented an Android photo sharing feature, allowing users to share photos of a listing through various channels. The feature increased total listing's shares by 8%.

Hack the North

Organizer

январь 2015 - январь 2016 (1 год 1 месяц)

Co-organizing Canada's largest hackathon

1000+ hackers, partnered with Y Combinator, sponsored by Google, Facebook, Apple, among many other tech companies

Yelp

8 месяцев

Software Engineer

январь 2015 - апрель 2015 (4 месяца)

- Developed and launched a full redesign of the main navigation menu for the Yelp mobile app; this was the biggest overhaul in user experience for the Yelp Android app since it launched in 2009.
- Increased the amount of daily contributions, such as reviews, tips, media content to the app through the navigation drawer redesign.
- Added material design elements throughout the app, including a UI redesign of search across the application. This redesign received very positive feedback from both users (Twitter) as well as Android bloggers (Android Police).

- Implemented a delightful feature for the new navigation (the slide menu) - an animated dinosaur.

Software Engineer

сентябрь 2014 - декабрь 2014 (4 месяца)

San Francisco Bay Area

- Implemented a photo/video uploader to a business' Yelp profile, leveraging the device's location to present the user a list of nearby businesses in which to associate the photo/video, this significantly increased media uploads.
- Improved the way users are prompted to rate Yelp's app in the App Store on iOS, as well as the user interface of the prompt on Android, which led to an increase in reviews on iOS and an increase in the review rating on Android.
- Organized a biweekly engineering lunch at Yelp, to encourage engineers from various departments to eat lunch together, communicate, and collaborate. This increased cross group communication and reinforced Yelp's culture and values.

European Games Group AG

Software Developer Intern

октябрь 2013 - апрель 2014 (7 месяцев)

- Worked on a knowledge management and data analytics dashboard tool using Django, Cron tab, and MySQL.
- Managed the content of the Facebook pages and planned the editorials, which led to a 10% increase in user engagement.

Ecosynthetix Inc.

Chemical Technician

декабрь 2012 - апрель 2013 (5 месяцев)

Burlington, Ontario

Prepared and analysed dispersions of R&D test samples (pH, colour, viscosity, solid analyzer "CEM", microscopy), participated in experimental design for new R&D products

Process Research ORTECH

Student Chemical Technician

май 2012 - август 2012 (4 месяца)

Mississauga, ON, Canada

Analysed solid and liquid samples from various research programs involving the extraction and refining of metals from ores

Образование

University of Waterloo

Chemical Engineering, Computer Science

Technische Universität München

Study Abroad, Chemical Engineer, Computer Science
